

Predictive Analytics for selecting, developing, leading and engaging talent

Remote Workforce Analytics

COVID-19 RELIEF OFFER: REMOTE WORK ANALYSIS OVERVIEW REPORT FREE TO THE END OF 2020

Whether remote work is new to your organization or you've been doing it successfully for years, your employees have likely experienced both the benefits and the challenges of getting things done away from the office.

Important questions to ask when implementing a remote workforce:

- How can the capacity to work remotely be measured and understood?
- How can leaders adjust their management style to help employees succeed in a remote environment?
- How can data and talent analytics assist in making good decisions for your organization?

Harrison has developed specific Remote Work Behavioral Competencies to help organizations maximize performance and meet the challenges of working in a remote environment. Using our unique behavioral competencies framework, we have developed two new competencies for **Remote Productivity** and **Remote Communication**.

There are two versions of the competencies: One for remote workers and the other for leaders who manage remote workers.

Remote Workers - can compare their own behavioral tendencies to those that are most likely to produce positive outcomes.

Leaders of Remote Workers - can gain insights into their own management style and potential adjustments that will benefit team members and organizational performance.

Remote Workforce Analytics

Different People = Different Challenges

While many people enjoy working remotely and do so successfully, a multitude of challenges can make it quite difficult for others:

- Requires self-discipline
- Possible lack of structure
- Lack of social contact and potential feelings of isolation
- Overwork/stress from not being able to switch off
- Difficulty prioritizing tasks
- Managing different kinds of interruptions from family, children, pets
- Adapting to new technology and associated outages
- Managing physical and mental health
- Lack of clarity in deliverables

Analysis - Identifying Development & Training Needs

The Remote Worker Analysis Reports target three distinct areas:

1. The Remote Work Behavioral Competencies which identify traits needed for effective remote productivity and communication.
2. The Behavioral Success Analysis Report identifies an individual's fit with the job which is the primary foundation for successful remote working.
3. The Engagement and Retention Report assesses the individual's level of engagement which is also a foundation for successful remote working.
